

# LED Light Therapy

SEE YOUR SKIN  
IN A NEW LIGHT

## LED Light Therapy

- State-of-the-art skin care technology
- Diminishes the appearance of fine lines, wrinkles and age spots
- Helps tighten unsightly pores
- Promotes collagen regeneration
- Skin appears naturally smoother, tighter, and more radiant
- Enhanced results for your client

ÉMINENCE  
HANDMADE  
ORGANIC  
SKIN CARE OF  
HUNGARY

## THE LED QUICK FACTS

- State-of-the-art skin care technology
- Diminishes the visible appearance of fine lines, wrinkles and age spots
- Helps tighten unsightly pores
- Promotes collagen regeneration
- Skin appears naturally smoother, tighter, and more radiant
- Clinically-tested and designed by dermatologists for use as a cosmetic treatment for salons, spas and physicians
- Painless with no recovery time
- Safe and sanitary
- Easy-to-use
- Increases your revenue
- Increases the results of your facials

## Overview

The new skin rejuvenation system using light technology has recently garnered considerable media attention, receiving positive reviews from many in the industry including *Dermatology Times*, *Skin Inc*, and *Day Spa* as well as the public media such as ABC's Good Morning America and shows like Extreme Makeover. Éminence has adapted this new technology into a cost-effective, portable and easy-to-use FDA-approved system that improves the skin's appearance.

Developed by dermatologists, the Éminence LED system incorporates a unique photopulsation technology which leaves a smoother, tighter and more radiant look to the skin with each subsequent treatment. This non-invasive technology truly gives the skin a more vibrant and youthful appearance as well as offers one of the quickest treatment times compared to other methods of skin rejuvenation. Immediately after a treatment, you can go straight back to work and resume your regular activities.

## HOW TO CHOOSE THE RIGHT LED SYSTEM

With more and more LED systems entering the market, it is essential to have a better understanding of where the differences lie in order to make the right decision for your skin. Since the system uses photopulsation technology, the power,

focus and wavelength of the light constitute the main differences between various LED system options in the market. To start with, different LED systems project a variety of wavelengths of LED light which are measured in nanometers (nm). Éminence LEDs use the most effective wavelengths for rejuvenation (red: 625nm and 940nm,

blue: wavelength 420nm and 455nm) whereas systems designed for home use typically use lower frequencies.

Secondly, frequency pulsation, the rate at which the light pulsates or turns on and off, is important when dealing with multiple treatments because of the skin's potential to become desensitized. The Éminence LED system is one of the very few devices that uses multiple frequencies to prevent de-sensitization and increase stimulation effects simultaneously. This is achieved through the LED lights' ability to turn on and off at alternating frequencies at such a quick pace with the irregularity unseen by the naked eye. This rapid speed also maximizes the amount of light the skin is exposed to, while the multiple frequencies ensure de-sensitization does not occur—producing overall more effective results for your skin.

Another important aspect to consider when evaluating the effectiveness of light therapy is the method in which the lenses are built to focus the light. The Éminence LED system uses a patented optical lens to focus the LED light in order to create a powerful concentration of intense LED light at skin level for optimal effectiveness. How the lens focuses the light varies from one machine to another making it important to find one that maximizes the LED light in order to achieve the greatest possible results.

And finally, as with any machine specifically designed for corrective procedures on the skin, cali-

bration of the system is essential. All Éminence LED machines are made in America and each unit is precisely calibrated to remain constant throughout the life of the unit. Every head piece will maintain the same intensity and wavelength from the very first time the system is used until the very last.

As all LED devices are not created equally, the Éminence LED system is the smartest choice for your skin as it incorporates the key points all estheticians and clients should consider when reviewing any photo rejuvenation system.

## TREATMENTS

It is suggested that treatments be performed between 7 and 14 days apart and depending on the age and skin condition of the client, it generally takes approximately six treatments of 10–15 minutes each to achieve desired results with maintenance treatments every 45 to 60 days thereafter.

The Éminence LED system comes with three handheld devices: 1 large red light, 1 small red light and 1 blue light device. The red LED light helps to encourage collagen production and healing in the skin. It also helps to increase blood and oxygen flow to the skin and capillaries, therefore increasing cellular metabolism and strengthening the capillary walls. As the red light can also help tighten the skin, this type of treatment is also ideal for anti-aging. Red LED light therapy is also an excellent treatment for scarring, post-inflammatory hyper-pigmentation and rosacea. The blue LED light is the only light currently approved by the FDA for acne as it destroys bacteria on the skin and prevents bacteria from forming.

Compared to other skin therapies such as microdermabrasion or invasive skin treatments, LED treatment times are quicker with no down time making it a convenient in-and-out service.

The BLUE LED LIGHT destroys bacteria on the skin and prevents bacteria from forming.

The RED LED LIGHT helps to encourage collagen production and healing in the skin and is ideal for anti-aging, rosacea, scarring, and post-inflammatory hyperpigmentation.

ÉMINENCE LED LIGHT THERAPY	OTHER LED SYSTEMS
Only device that uses multiple frequencies to prevent desensitization	Use a singular frequency for pulsating lights
Uses the most powerful system available for fast and effective treatments	Home devices and other systems are less powerful which equates into longer treatment times
FDA approved for acne vulgaris using the Blue Pulsator	May not be FDA approved
Patented optical lens for shorter and more effective treatments	Regular lens which may not be as effective
Uses effective wavelengths for superior results	Use varying wavelengths for less effective results

## Before & Afters

The client wanted to improve the texture and colour of her skin as well as diminish fine lines and wrinkles. Improvement was seen after four treatments using only LED light therapy. Further improvement will be seen with continued treatment.

Acne, wrinkles, scarring and age spots are just some of the conditions the Éminence LED Light Therapy System have helped address in clients all over North America. When natural and organic skin care products are combined with this impressive technology, the results are clearly amazing!

As the leader in organic skin care, Éminence provides effective skin care products and state of the art technology—offering the best of the best in skin care treatments.

## Testimonials

Promising results at San Antonio Massage Clinic, treating injured soldiers:

The LED light therapy is showing promising results in our treatments for burns: lessening pain and helping to loosen and soften scar tissue. Our preliminary observations are positive and we look forward to seeing the continued improvement for our patients.

*San Antonio Massage Company, San Antonio, TX*

Dear Éminence, We love the LED Light Therapy machine! We have used the machine for a few months and the results are amazing. We have used the machine on clients who have recently had Facial Surgery and just after one session, you can see a dramatic decrease in swelling and redness. The skin appears and feels tight, firm, stimulated and rejuvenated. We have seen great results in decreasing Acne with the Blue

light, as well as using the small Red light after the Éminence Eye Quattro Treatment. I recommend LED Light Therapy to everyone I know because the treatments are painless, cost-effective, you have no downtime and who doesn't want to look even more fabulous! Thank you Éminence for offering this incredible machine, and for your continued commitment to providing outstanding education, customer service and an honorable product line.

*With Love, Citrine Skin Care, Redlands, CA*

I can't believe the results, I'm taking before and after pictures and the difference is amazing. I was hesitant at first, but now I am a believer.

*Jeanne, Palm Beach Gardens, FL*

Some results were just miraculous.

*Veronica, Long Island, NY*
